

# Can't come to the National Conservation Area? Red Rock Canyon will come to you!

*Experience...*

## Red Rock Canyon National Conservation Area

Starting in **Fall 2007**, Red Rock Canyon Interpretive Association will offer in-classroom, curriculum based environmental education programs for classes K-5.

### Programs Offer:

- \* A naturalist will be available to conduct in-classroom Environmental Education programs throughout the Las Vegas Valley. Programs are grade specific and based on CCSD curriculum and power standards.
- \* Environmental education programs take approximately 45 minutes. An Instructor is available to come to your classroom on Wednesdays and Thursdays between 9am and 1 hour before the end of your school day. Instructors can conduct up to four programs per school per day.
- \* Scheduling will be conducted on a first come first served basis.
- \* Programs are broken into Core and Auxiliary levels, depending upon teacher interest and student background. While Core programs focus on general aspects of Mojave Desert life and ecology, classes already familiar with these topics may choose from more specific auxiliary programs.
- \* For a list of all programs offered per grade level, see program outline.

**Programs and information may change.**

**Schedule *next year's* classroom programs now!**
